

## BSD 3102 Assignment 1

### **Instructions**

1. Attempt the question in groups of 2. **Choose your member wisely as we will retain the same groups throughout the semester.**
2. **Take a photo** of your final diagram and include the details of all the group members in your submission.
3. **1 member can submit on behalf of the group. No need for duplicate submissions.**

Represent the following as a *semantic network*

John, a human being, owns four pieces of furniture - a table, two chairs and a bookshelf in his office. All four pieces of furniture are made of wood. The table and chairs have four legs. The colours of the table, chairs and bookshelf are blue, brown and white respectively and John is sitting on one of the chairs. Mary, John's secretary, is sitting on another chair.
